(54) Title: INPUT-DEVICE MOVEMENT TO CURSOR MOVEMENT CORRELATOR

(57) Abstract: A method and system to detect a correlation of movements of an input device, sent from a first location (510), with at least one configurable movement parameter set on a remote computer at a second location (520) remote from the first location, wherein the method includes (a) sending first movement information from the the first location to the remote computer at the second location, the movement information corresponding to a first movement of the input device, (b) tracking a resulting movement of a cursor of the remote computer at the second location in response to the remote computer having received the first movement information and utilized the at least one configurable movement parameter, (c) calculating predicted movements utilizing at least two possible values for the at least one configurable movement parameter, and (d) determining which of the at least two possible values provides the predicted movement most closely matching the resulting movement of the cursor.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US06/21181

A. CLASSIFICATION OF SUBJECT MATTER

IPC: **G06F 3/033**(2006.01)

USPC: 345/156-161

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 345/156-161

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
((keyboard/video/mouse) or (KVM) and cursor and calculator and location and movement.

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	US 2003/0135656 A1 (SCHNEIDER et al) 17 July 2003, figures 1-10, whole document.	1-21
A	US 2004/0160967 A1 (FUJITA et al) 19 August 2004, figures 1-5, whole document.	1-21
A	US 2005/0007344A1 (COOK et al) 13 January 2005 (13.01.2005). figures 1-4, whole document.	1-21
A	US 2007/0033265 A1 (ANDERSON et al) 08 February 2007 (08.02.2007). figures 1-29, whole document.	1-21

☐ Further documents are listed in the continuation of Box C.

☐ See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&"

document member of the same patent family
